### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose or suggest the specific arrangement of the combination of structural limitations as set forth in applicant's claims above. In particular the prior art fails to disclose or suggest a hinge including a self-contained housing separate from a first unit and a second unit. A first rotating member coupled to the first unit and rotatable about a first rotation axis with respect to the housing, a second rotating member coupled to the second unit and rotatable about a second rotation axis with respect to the housing. Further, the hinge comprising a hinge unit including a first linearly moving member cooperates with the first rotating member and linearly movable with respect to the housing and a second linearly moving member cooperating with the second rotating member and linearly movable with respect to the housing. A first resilient member urging the first linearly moving member against the first rotating member and a second resilient member urging the second linearly moving member against the second rotating member wherein the first and second rotation axes extend side-by-side and are substantially parallel with respect to one another and the housing encloses the components of the hinge unit. None of the prior art references disclose or suggest the specific arrangement as claimed whether taken alone or used in combination thereof. Therefore, the Examiner believes applicant's claims are patentably distinct from the prior art made of record and the general prior art relating to hinge devices.

### CONCLUSION

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
